

ADTech COVID-19 IgM/IgG Rapid Kit

ADTech COVID-19 IgM / IgG KIT is a gold nanoparticle based immunochromatography test kit that qualitatively measures IgM and IgG antibodies COVID-19 in whole blood, serum or plasma. The kit is accurate, easy to use, and results can be checked the naked eye within 10 ~ 15 minutes.

Certification:

- * KMDS/KR
- * CE/EU
- * Registered FDA EUA

Note :

If a U.S. purchasing company asks the FDA to cooperate with the EUA that already applied by AdTech for quick approval, it will be helpful to get an temporary EUA. If a temporary EUA comes out, it will allow sales and diagnostic use in the United States, and then a formal EUA will be issued.

Specimen type:

- Finger-Prick Blood
- Serum, Plasma and Venous whole blood

Components:

- Test device (sealed in aluminium pouch with desiccant)
- Sample buffer
- Alcohol swab
- Capillary tube
- Lancet
- Additional Equipment - Micropipet, Timer, Disposable gloves

Test Result:

Reading in 10~15 minutes, no need reading equipment

* Freight Term : by FOB Korea
